

Research commissioned a survey that asked 100 IT decision makers for their thoughts on tasks and moving applications to the cloud.

"Which of the following do you see as the greatest motivator to move from a traditional server/hosted environment towards IaaS?"

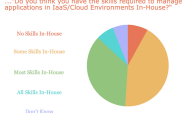

Overall, cost saving and flexibility are the two main motivators when moving towards IaaS.

"Which of the following do you think is the biggest barrier to moving from a traditional server/hosted environment to IaaS?"

"If you were to use an IaaS provider, which of the following strategies for management would you be most likely to pursue? If you have already moved to an IaaS provider, then what strategy do you use?"

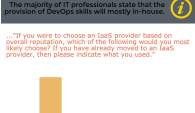

"Do you think you have the skills required to manage applications in IaaS/Cloud Environments In-House?"

"How high on your list of IT priorities is moving applications to the Cloud/IaaS? If you have already moved to applications to the Cloud/IaaS, then how high a priority was it prior to moving?"

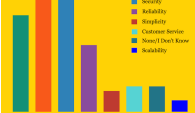

"What is the strategy for provision of DevOps skills in your business?"

"If you were to choose an IaaS provider based on overall reputation, which of the following would you most likely choose? If you have already moved to an IaaS provider, then please indicate who you use."

"Which of the following do you think are the most important factors to consider when making a buying decision around IaaS/Cloud services?"

"If you have moved, or are planning to move to IaaS from a traditional server environment, which of the following best describes how your applications work/will work?"

"Overall, how ready do you feel your organisation is for a move away from traditional server/hosted environments towards IaaS?"
